```java
1 package xyz.amtstl.soup.logic;
2
3 public class FilterSpace {
4     public static String rejectSpaces(String input) {
5         String out = "";
6
7         for (int e = 0; e < input.length(); e++) {
8             if (input.charAt(e) != ' ') {
9                 out += String.valueOf(input.charAt(e));
10            }
11        }
12
13        return out;
14    }
15 }
```
