```java
1 package xyz.amtstl.soup.exceptions;
2
3 public class SoupVariableException extends Exception {
4     private static final long serialVersionUID = 1L;
5
6     /**
7      * Exception is thrown when Soup tries to recall a variable that is non-existent
8      * @param var the memory point that was requested
9      */
10     public SoupVariableException(int var) {
11         super("Soup can not find variable: " + String.valueOf(var));
12     }
13 }
```
